

KUBAN

COFFEE PROCESSING MASTER™

[kubancoffeeroasters.com](http://kubancoffeeroasters.com)

Kuban Coffee Roasters was established in 1996 by Ahmet Demirden in İzmir, Turkey. When our passion for coffee became irresistible, we decided to turn this love into a business. We produce “coffee processing machines and equipment” for coffee-lovers.

We have expanded our product range since the beginning of our operations, and now, we serve both the domestic and international markets. Nearly 25 years of experience in the coffee industry has brought us mastery. Moreover, we constantly improve our products and services based on customer satisfaction with our dynamic and disciplined team.

As the KUBAN Family, we represent our country at many annual international fairs on coffee and coffee equipment. In addition to in-house R&D activities, we try to set a high standard in the industry by keeping up with technological innovations and keeping the bar high at all times. We pioneer this passion by using high-quality raw materials in all of the products that we produce.

TEAM KUBAN

## WHAT WE OFFER

With 25 years of experience in the coffee industry, we are constantly improving our products and services based on customer satisfaction.

### EXPERIENCE;

Establish your business in the coffee industry and make the right choices.

### SUSTAINABLE QUALITY;

The uninterrupted quality of your production is an essential standard for us.

### INNOVATION & RD;

We improve our products and make innovations with current edge technologies.

### CUSTOMER SERVICES;

We aim for customer satisfaction after the sale. We provide full support to our customer at every stage.

## KUBAN SUPREME

### KUBAN SUPREME COFFEE ROASTERS

Supreme roasters are designed for small to middle large coffee production business with advanced technology and ergonomic design. We offer an exclusive roasting experience and sustainable high quality coffee production with our new generation coffee roaster.

#### PRODUCT FEATURES

##### MASTERFUL CRAFTSMANSHIP

Easy to use coffee roasters with unique design. Craftsmanship is the quality that comes from creating with passion, care, and attention to details. With our experience and passion for our work, we offer unique design coffee roaster machines and equipment for our valued customers.

##### ADVANCED TECHNOLOGY

Manage your coffee roasting process with smart technology. We aim to help coffee roasters stay organized, informed, and supported throughout the roasting process with Kuban Roast Manager.

##### ENERGY SAVING

High heat insulated Supreme series roasters provide efficiency, hot air kept inside the drum and heat abduction rate is at minimum. Pre-Mix burners are far better ahead of other types of burners in terms of efficiency, effectiveness, and performance.

##### ENVIRONMENTAL FRIENDLY

Combustion emission such as CO, CO<sub>2</sub>, NOX come out is lesser for pre-mix burners. As a result, premix burners are more environmental friendly and provide higher energy saving. In addition, the Afterburner Equipment complies with global emission standards and provides a high level of environmental protection.

## KUBAN ROAST MANAGER

### Manage Your Coffee Roasting Process With Smart Technology.

#### PRE-HEAT

This feature enables your coffee roasting machine to reach the desired temperature without tracking at the scheduling time. This feature not only prevents unnecessary energy consumption but also ensures homogenous heating. If there is no intervention within 15 minutes, the machine will automatically shut down, helping to save energy.

#### END - DAY

The End-Day feature allows you to set your coffee roasting machine to turn off automatically at the end of the day. By default, the machine's motors are disabled at 50°C, helping to ensure safe and efficient operation. This feature helps to conserve energy and prevent unnecessary wear and tear on the machine, making it a valuable tool for coffee roasters looking to optimize their operations.

#### ROASTING APP

Kuban Roast Manager provides coffee roasters with an easy-to-use interface for controlling and monitoring all roasting parameters, including flame level, rpm adjustment, and more. The app also allows you to save and compare roast profiles, making it easy to replicate successful roasts and make adjustments for future batches. With its intuitive interface and comprehensive data tracking, the Roasting App is an essential tool for coffee roasters looking to achieve consistent, high-quality roasts.

#### PROFILE APP

We call this application "Profile Inventory and Editor". Thanks to the industrial computer we are using, you can save unlimited profiles. With the Profiling App, coffee roasters can quickly create new profiles or adjust existing ones to achieve the perfect balance of flavor and aroma in their coffee.

#### COFFEE APP

The coffee app, also known as the "Green Bean Inventory," allows coffee roasters to track their green coffee bean inventory and connect it to relevant roast profiles. By adding green bean information to the inventory, coffee roasters can easily track stock levels and see how many roast profiles are created from one type of bean. The Coffee App is a valuable tool for coffee businesses looking to optimize their inventory management and streamline their roasting processes.

#### MAINTENANCE APP

It allows coffee roasters to track the maintenance needs of their coffee roasting machine and stay on top of maintenance schedules. With the app's intelligent reminder system, coffee roasters can easily schedule and track maintenance tasks, helping to prevent unexpected downtime and ensure the machine is operating at peak performance. The Maintenance App is a valuable tool for coffee roasters looking to optimize their machine's lifespan and avoid costly repairs.

#### CALENDAR APP

It allows users to schedule future orders and plans, and provides intelligent reminders to help ensure they are prepared for important events.

#### SETTING APP

This app lets users check system updates, provide feedback to the Kuban Team, and view the hardware error history of the machine. In addition, the users can adjust some parameters in this section.

#### ANYDESK APP

If you have any problems or questions, our technical team can connect to your machine remotely via this application and provide the necessary support.

## KUBAN BASE

### KUBAN BASE COFFEE ROASTERS

#### TRADITIONAL ROASTING

Kuban Base Series has a wide range of roasting capacities and functionality with a flexible design with great ergonomy offering efficiency for every batch. Thanks to the easy control systems of the Base Series Roasters; beginners, professionals, or roasters that seek special roasting profiles can easily roast the beans.

#### PLC & SOFTWARE SYSTEM

Kuban offers the PLC touchscreen controller with its software as optional with the coffee roaster machines. Users can create their own unique roasting profiles. In addition to this, all Kuban Roasters are compatible with ARTISAN and CROPSTER.

#### CUSTOM DESIGN

Our machines can be customized according to your demands. Coffee roasters can be sized according to your various requests and needs, and color changes and special designs can be applied on a project basis.

#### FUNCTIONAL

To obtain more consistency in your roasting profile, you can modify the drum speed up to 70 RPM. Combining this feature with airflow alternation and flame level adjustment offers you more consistent roasting profiles.

#### EUROPEAN STANDARDS

All electric and electronic components of the coffee roasters consist of well-known brands with CE certificates.

# 03 MASTER ROASTERS

## KUBAN INDUSTRIAL ROASTERS

### Reliability and Durability

One of the key features of our coffee roaster machines is their longevity. We know that our customers rely on our machines to operate smoothly and efficiently for many years, and that's exactly what our machines are designed to do. With regular maintenance and care, our machines can provide reliable and consistent results for years to come. Our machines are constructed with high-quality materials, including stainless steel and cast iron, to ensure that they can withstand the wear and tear of daily use. We use only the best components in our machines, and all of our machines undergo rigorous testing and quality control measures to ensure their reliability and durability.

Investing in a coffee roaster machine from KUBAN is an investment in a reliable and durable piece of equipment that will provide you with years of high-quality coffee roasting.

### Advanced Technology

Kuban Roasters are designed with a range of advanced features and technologies that make coffee roasting easier, more precise, and more consistent than ever before. Our machines come equipped with sophisticated sensors and software that allow you to monitor the roasting process in real-time and collect data on key parameters such as temperature, time, and airflow. This data can be used to optimize your roasting process and ensure consistent, high-quality results. At KUBAN, we are passionate about pushing the boundaries of coffee roasting technology to create machines that deliver exceptional results.

### Sustainability

At KUBAN, we are committed to providing sustainable solutions for coffee roasting that prioritize quality and flavor. We believe that sustainability and quality should go hand in hand. One of the key ways we promote sustainability in our machines is by using energy-efficient technologies. Our machines are designed to use the minimum amount of energy necessary to achieve optimal roasting results, which not only helps to reduce your carbon footprint but also saves you money on energy bills. Our machines also promote sustainability through their longevity.

### European Standards

Our machines are built using high-quality materials and components, ensuring that they meet or exceed all applicable European standards for electrical safety, electromagnetic compatibility, and more. We conduct rigorous testing and quality control procedures at every stage of production to ensure that our machines meet the highest European standards for performance and reliability.

# 04 MASTER GRINDERS

## KUBAN TURK

Our KM05 series has been manufactured and developed for more than 20 years and is almost as old as KUBAN. As one of the machines produced by using our knowledge and experience in the best way possible, the KM05 series has crowned its success by becoming the most-preferred product and proved this with its sales. It is named by our customers for offering the best grinding process for Turkish coffee.

GRINDING CAPACITY  
16 kg/hour - Turkish Coffee

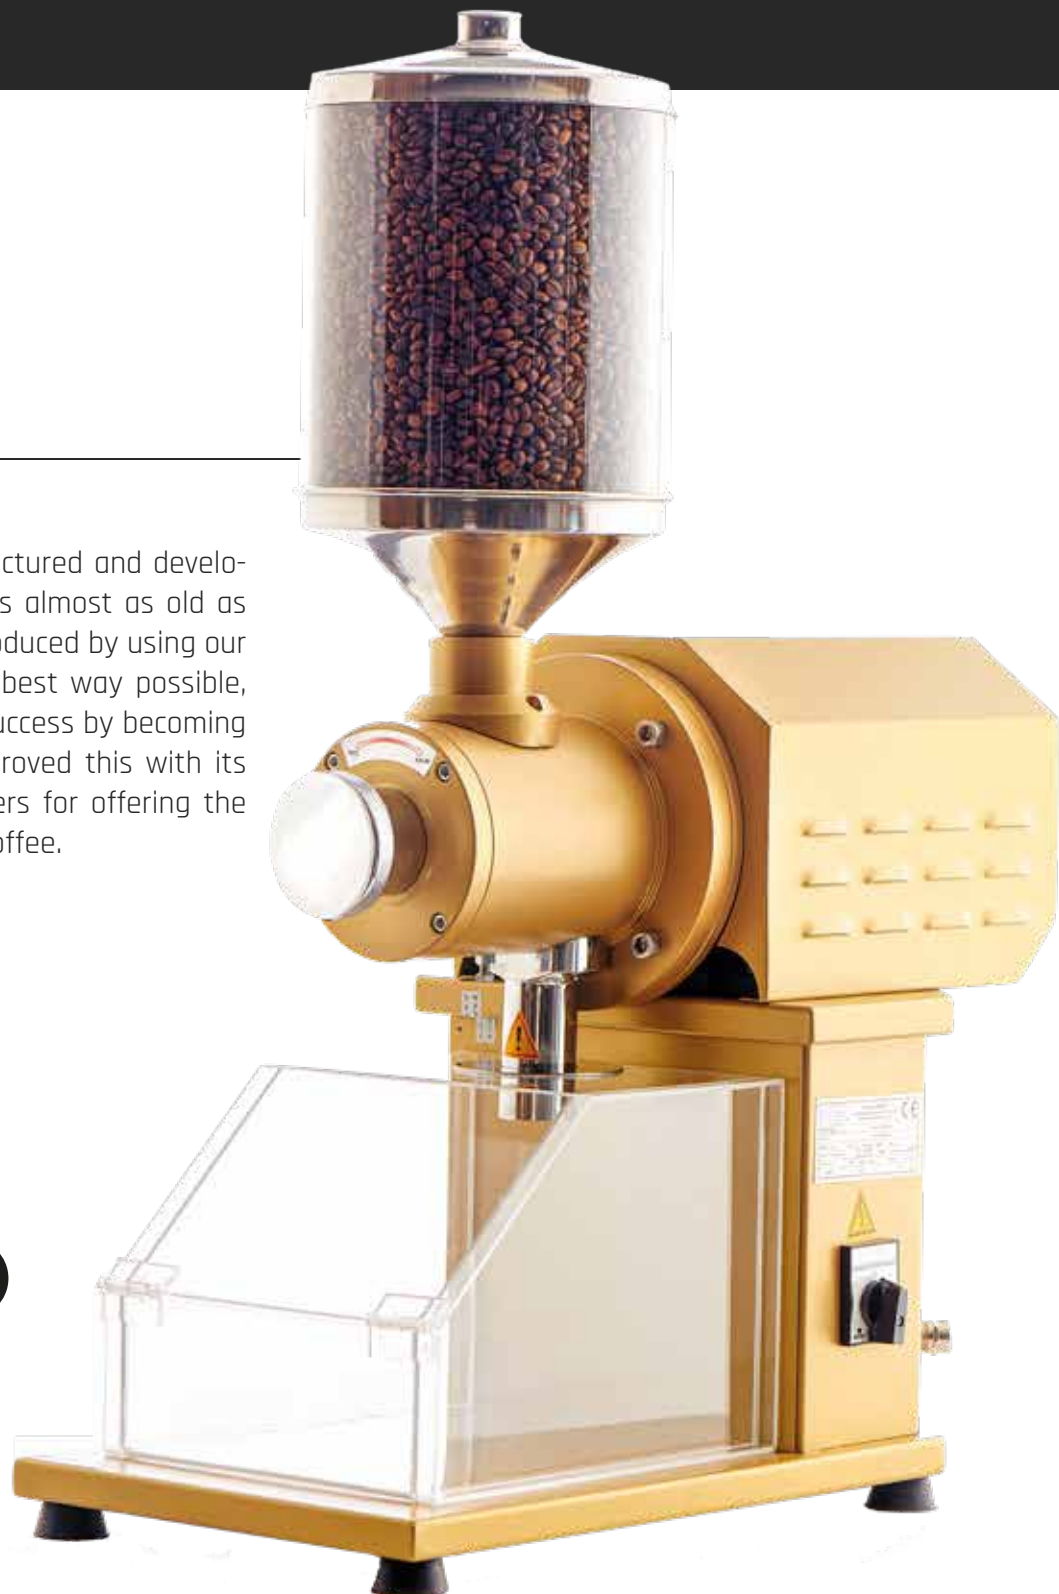

Red

# 04 MASTER GRINDERS

## KUBAN SHARP

KUBAN SHARP is a semi-industrial coffee grinder. It is used for commercial and industrial purposes to obtain freshly-ground coffee. It has CE Certification and complies with European standards.

With the adjustment lever on the front panel, it can perform 3 different grinding operations: espresso, drip coffee, and Turkish coffee. It can grind various grains and spices as well as coffee beans. With the "clip" above the exit chute, it offers complete service by enabling instant packaging.

#### GRINDING CAPACITY

90 kg/hour - Turkish Coffee  
120 kg/hour - Espresso  
200 kg/hour - Drip Coffee

Red

Yellow

Black

## KUBAN SHARP PRO

KUBAN SHARP PRO is an industrial coffee grinder. It is named "Pro" since it combines the latest technology and the highest-quality products.

It is the best solution for industrial mass production with its extremely powerful motor, stainless steel discs of 200 mm, and double cooling fans. In addition, it has its own chrome lower hopper for storing ground coffee.

#### GRINDING CAPACITY

150 kg/hour - Turkish Coffee  
200 kg/hour - Espresso  
300 kg/hour - Drip Coffee
